TECHNICAL SKILLS

Languages

Core Java, Python, SQL, C++

Databases

MySQL, MongoDB, Pinecone, ChromaDB

Cloud & Platforms

AWS, Azure, Google Cloud Platform

Libraries & Frameworks

Pandas, NumPy, Scikit-learn, Matplotlib, PyTorch, TensorFlow

Dev/Workflow

Git, CI/CD, Docker, Playwright, Kubernetes

AI & Machine Learning

LLMs, AI Agent Development, Multi-Agent Systems, RAG, Agentic AI, AI Workflow Automation, Gen AI, FastAPI, Flask

LLM Frameworks

LangChain, LlamaIndex, Hugging Face

Data Pipelines

Apache Kafka, Spark

CERTIFICATIONS

Microsoft Certified

Azure AI Engineer Associate (AI-102)

Microsoft Certified

Azure Fundamentals (AZ-900)

TestMu AI Certified

Playwright 101

EDUCATION

B.Tech in Computer Science Engineering
Blockchain Technology Specialization
Samrat Ashok Technological Institute, Vidisha
2022 - 2026

Higher Secondary (12th)
New Shanti Niketan Higher Secondary School
Vidisha, Madhya Pradesh
2022

Secondary School (10th)
Trinity Convent Senior Secondary School
Vidisha, Madhya Pradesh
2020

PROFESSIONAL SUMMARY

Azure-certified AI Engineer specializing in multi-agent architectures, Large Language Models (LLMs), and Retrieval-Augmented Generation (RAG) systems. Demonstrated expertise in developing autonomous AI workflows and evaluation pipelines, with hands-on experience deploying offline-capable AI voice assistants and NLP-driven automation tools. Proficient in Python, core machine learning frameworks, and containerized deployment (Docker/Kubernetes), combining a strong foundation in scalable cloud infrastructure with a passion for building robust, intelligent business solutions.

PROJECTS

AI Integrated Auto Apply Software

Multi-Site Job Automation | 2024

- Built end-to-end automation for job applications across multiple platforms
- Integrated AI for resume tailoring and cover letter generation
- Reduced manual application time by 90%

Autonomous Multi-Agent Task Solver

- Developed a collaborative multi-agent system utilizing LangChain and lightweight LLMs to autonomously break down and execute complex user objectives.
- Equipped agents with custom tool-calling capabilities, enabling independent querying of SQL databases and interaction with external REST APIs to fetch real-time data.
- Hosted the asynchronous backend on cloud infrastructure via FastAPI, seamlessly connecting it to a Vercel-deployed frontend for interactive user demonstration.

AI On Call @[supernovaind.com](#) Founder and COO

Offline Voice Assistant | 2025

- Created offline AI calling agent using local LLM models
- Engineered a low-latency offline voice assistant utilizing local LLMs (Ollama) and custom STT/TTS pipelines, enabling zero-connectivity deployment for low-resource environments.
- Designed for low-resource environments without connectivity

INTERNSHIP

TestZeus (April 2026 - July 2026)

Associate Engineer Intern - Hercules Benchmarking

- Designed and implemented an end-to-end evaluation harness integrating the Testzeus-Hercules multi-agent system into the SCUBA benchmark framework (300 Salesforce tasks across admin/sales/service personas)

- Adapted the SCUBA evaluation pipeline (originally built for Browser-Use) to run Hercules' AutoGen-based multi-agent architecture, handling auth, org reset, milestone grading, and trajectory capture

- Built automated conversion of SCUBA task descriptions into Gherkin feature files for Hercules, enabling structured step-by-step execution on the benchmark corpus

- Performed deep root-cause analysis on benchmark failures from real agent trajectories (GKE run artifacts)

- Built a Gradio live visualizer for real-time agent trajectory monitoring
